

# USA Tank Storage Systems

Dry Bulk Storage Systems

## Dry Bulk

The bolted steel tanks that USA Tank uses are far superior to all other storage tank products currently available. The installation timeline for these tanks is reduced due to proven prefabrication components and erection crews with years of superior tank building experience.

### USA Tank's field installation involves:

- Field crews that are factory-trained direct employees
- Foundation design and installation services
- Complete system installation
- Turnkey responsibility
- Professional in-house project management

USA Tank can design a dry bulk storage system to suit your specific needs, whatever they may be.

### We offer a variety of dry bulk storage applications, including:

- Plastic pellets
- Grains and food products
- Sand and cement
- Fly ash
- Coal and coke
- Lime and limestone

### Storage Tank products available:

- Bolted or shop-welded
- Skirted, hopper bottom
- Bolted skirted truck or rail drive through
- Structural steel supports
- Column can enclosures
- Shop-welded, lug-supported replacement parts and accessories

*USA Tank has been engineering and constructing customized storage systems for over 30 years. From the sales staff to experienced construction crews and specialized engineering through total project management, USA Tank has everything your project requires. Count on USA Tank for quality, value, and a finished product we can proudly claim is holding to a higher standard.*
